Ways to save

With energy cost rising and food retailers looking to improve the shopping experience environment for customers, Insulated Structures has developed an effective solution to reduce the cost of in-store refrigeration while enhancing the customer experience.

Insulated Structures doors are easy to retrofit on in-store cabinets to reduce the energy required to keep chilled foods at the correct temperature.

Meanwhile, customers are able to clearly see and access the products on offer. Reduce energy requirements means smaller refrigeration plant selection for new stores. These savings will off-set the initial cost of the doors. Up to 40% reduction in refrigeration requirement has been achieved.

Benefits

- Reduce Energy consumption.
- Extend Product shelf life.
- Double Glazed Argon filled void for better insulation.
- Optimal Product temperature.
- Glass door have an options of Mullion lights. Quoted separate.
- Handles included.
- Up to 40% energy saving.
- Solution for new cabinets or retrofitted on existing cabinets.
- Doors are spring loaded.
- Less cold air spillage – warmer aisles.
